Pages Number: 118 Publisher: Beijing Normal University Press Pub. Date :2009-8-1. The vast expanse of the universe, the solar system is just a drop in the sea, the mysterious variable star, the beautiful nebula, but slightly sad spectacular supernova sites, there are many distant space waiting for the contents of the students to understand, to learn. This book is a key to open the door to deep space, and lead us tackling the factors the mystery. This book presents a series of deep space outside our solar system objects: binary stars, supernova, nebulae, star clusters, galaxies and so on. As a high school elective courses teaching astronomy, theoretical calculations, optical analysis and other related content on the classic teaching is not the focus of this book. How to allow students to make use of relevant equipment, observing deep sky objects, deep space objects to explore how the science of astronomy for students to carry out teaching activities is our ultimate goal. This book is the author of Science and Technology Museum in Beijing's Dongcheng District, Wang Meng young teacher. Book in the writing process are also invited to the Beijing astronomical science teacher costs as a technology consultant, Mr. Yuan Liang, hereby thanked. Hope this book can be used as the majority of primary and secondary students to understand the mysteries of the universe deep space astronomy, for carrying out the campus and make due contributions to astronomical science. Book written in units of Dongcheng District, Beijing Youth Science and Technology Museum, the museum has a has a high school, intermediate professional titles of teachers, has become the region's primary and secondary school science and technology centers, research centers...
