Report Volume 59

By Michigan. Dept. of Instruction

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 240 pages. Dimensions: 9.7in. x 7.4in. x 0.5in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: . . . be shown that by putting together one and one, one and one and one, etc, we arrive at the system of whole numbers or, positive integers as they are more usually designated. Having agreed to define two numbers as equal when to every element of the first there is a corresponding element of the second, and reciprocally to every element of the second there is a corresponding element of the first, to define two numbers as unequal when to every element of the first there is a corresponding element of the second, but not reciprocally (in which case we say the first is less than the second, the second greater than the first), we are prepared for addition. This we define to be the process of forming from two numbers, a and b, a third c, which shall contain all the elements belonging to both a...
